KP. MUARA RT: 004, RW: 010, PASIR JAYA, KOTA BOGOR, BOGOR BARAT, JAWA BARAT

Freshgraduate Informatics Engineering from Universitas Indraprasta PGRI with a GPA of 3.57. Experienced in building academic information systems and web-based decision support systems using HTML, CSS, JavaScript, PHP, and MySQL. Accustomed to facing technical challenges in project development and finding solutions independently, as well as working collaboratively within a team with good coordination. Possesses strong time management skills to complete multiple projects in parallel, adapts quickly to new situations and technologies, and is experienced in managing and distributing tasks within a team to achieve shared goals.

EDUCATION

SMAN 1 Kota Bogor — **Bogor**
Science (MIPA) — **May 2020 - May 2022**

Completed secondary education with a focus on Mathematics and Natural Sciences. Also active in the Paskibra (Flag Ceremony Corps) extracurricular, honing teamwork, communication, and organizational responsibility skills.

Over three years at SMAN 1 Bogor, I was actively involved in organizational activities in Paskibra, with a role that grew from member to leadership position. I started as a member of the Event Division in 2020, where I helped design the concept for the annual "Jatayu Challenge" event and was responsible for finding sponsors. The following year, I was trusted as Deputy Head of the Event Division, coordinating the team and successfully transforming the event into an online format amid PPKM restrictions. This experience continued in 2022 as Secretary General, where I managed administration and served as the communication bridge between the organization and the school.

Universitas Indraprasta PGRI — **Jakarta**
Bachelor's Degree, Informatics Engineering | GPA: 3.57/4.00 — **August 2022 - September 2026**

Studying with a focus on software development, information systems, and artificial intelligence applications. Throughout my studies, I have actively worked on various web-based projects for both academic and freelance purposes. For my thesis, I built a web-based Decision Support System (DSS) using PHP and MySQL comparing the AHP and SAW methods for recommending university majors to high school students. I also developed a personal finance assistant chatbot based on n8n, integrated with Telegram, Google Sheets, and OpenRouter AI for automatic transaction recording, currency conversion, budget alerts, and monthly reports — later expanded into a goal-based money management bot using a LangChain-based AI Agent. Additionally, in my 7th semester I completed an internship project building a marketing website for the Sirkus Waterplay indoor waterpark using Next.js, Tailwind CSS, and TypeScript together with 6 teammates.

INTERNSHIP EXPERIENCE

PT. Putra Prasendo Berkarya — **Bekasi**
Web Developer, Intern — **March 2025 - August 2025**

Designed and developed the Sirkus Waterplay website, an indoor waterpark with a circus theme located in Jatiasih, Bekasi, using Next.js 15 and Tailwind CSS. Built the interface from scratch, including an interactive animated hero slideshow section to reinforce the playful circus theme, along with decorative CSS-animated mascots as visual branding elements. Also handled image optimization with Next.js Image, Google Maps integration, and codebase management using Git. Beyond the technical aspects, I also helped distribute tasks among team members and monitored work progress to stay on timeline, while serving as the main point of communication between the team and the Field Work Practice (KKP) supervisor.

AWARDS

Published Journal "Analysis of ASN Data Breach by TopiAx: Ethics, Cybersecurity, and Personal Data Protection"

JRIIN (Journal of Informatics Research and Innovation) • Local • 2025

Lead author of the journal article "Analysis of ASN Data Breach by TopiAx: Ethics, Cybersecurity, and Personal Data Protection," published in JRIIN (Journal of Informatics Research and Innovation) Vol. 3, No. 8, January 2026. The research examines the case of a 4.7 million ASN data breach by BKN carried out by the TopiAx (2024) threat group, using a qualitative case study approach analyzing cybersecurity technical weaknesses (zero trust architecture, encryption, auditing systems), IT professional ethics violations, and the effectiveness of implementing Personal Data Protection Law No. 27/2022 in Indonesia's government sector.

SKILLS

Soft Skills	English, Adaptability, Analytical Thinking, Time Management, Continuous Learning, Teamwork
Hard Skills	CSS, PHP, HTML, TypeScript, JavaScript, Next.js, Tailwind, MySQL, React
